Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	
Project Name	Exploration of Electricity Consumption Patterns
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Data Upload	Upload electricity consumption CSV Validate file format Handle errors gracefully
FR-4	Dashboard Access	View dashboards by state Apply filters (year, sector) Drill-down into specific trends
FR-5	Report Generation	Export dashboards to PDF Export data to Excel Schedule automated reports
FR-6	User Management	Create, delete, and assign roles Manage permissions Reset passwords

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	Dashboard must be intuitive, with clear navigation and tooltips for filters.
NFR-2	**Security**	Ensure secure login, encrypted data storage, and role-based access control.
NFR-3	**Reliability**	System should handle large datasets without crashing; ensure consistent uptime.
NFR-4	**Performance**	Dashboards must load within 3 seconds for standard datasets.
NFR-5	**Availability**	System should be available 24/7 with minimal downtime.
NFR-6	**Scalability**	System must support increasing data size and additional users without performance loss.
