Empathy Map Canvas: Electricity Consumption Dashboard Users

Think & Feel

- Users worry about the accuracy of electricity consumption data.
- They aspire to make informed, data-driven decisions for policy and planning.
- Major preoccupations include sustainability, cost efficiency, and meeting regulatory requirements.

Hear

- Analysts hear from colleagues about difficulties in accessing reliable datasets.
- Policy makers hear public demand for transparency and accountability.
- Influencers and industry experts emphasize the importance of renewable energy integration.

See

- Users see fragmented datasets across multiple government portals.
- They notice dashboards that are outdated or lack interactivity.
- They observe peers using advanced analytics tools and want similar capabilities.

Say & Do

- Analysts often say they need faster, cleaner insights.
- Policy makers publicly emphasize energy efficiency and sustainability goals.
- Users manually clean data, prepare reports, and share them in meetings.

Pain

- Difficulty in accessing centralized, reliable data.
- Time-consuming manual analysis.
- Frustration with outdated tools and poor visualization.
- Limited technical expertise among some stakeholders.

Gain

- Confidence in making policy decisions backed by data.
- Clear, interactive dashboards that save time.
- Ability to forecast demand and plan resources effectively.
- Improved collaboration across teams with shared insights.

What this dish look like?
Annoying
Doesn't want frozen food
What should I eat today?
I'm hungry, but I don't have time to go downstairs
Why don't they provide card payment
There are many food selections
Don't forget to prepare your cash
It looks like.....
Think & Feel
