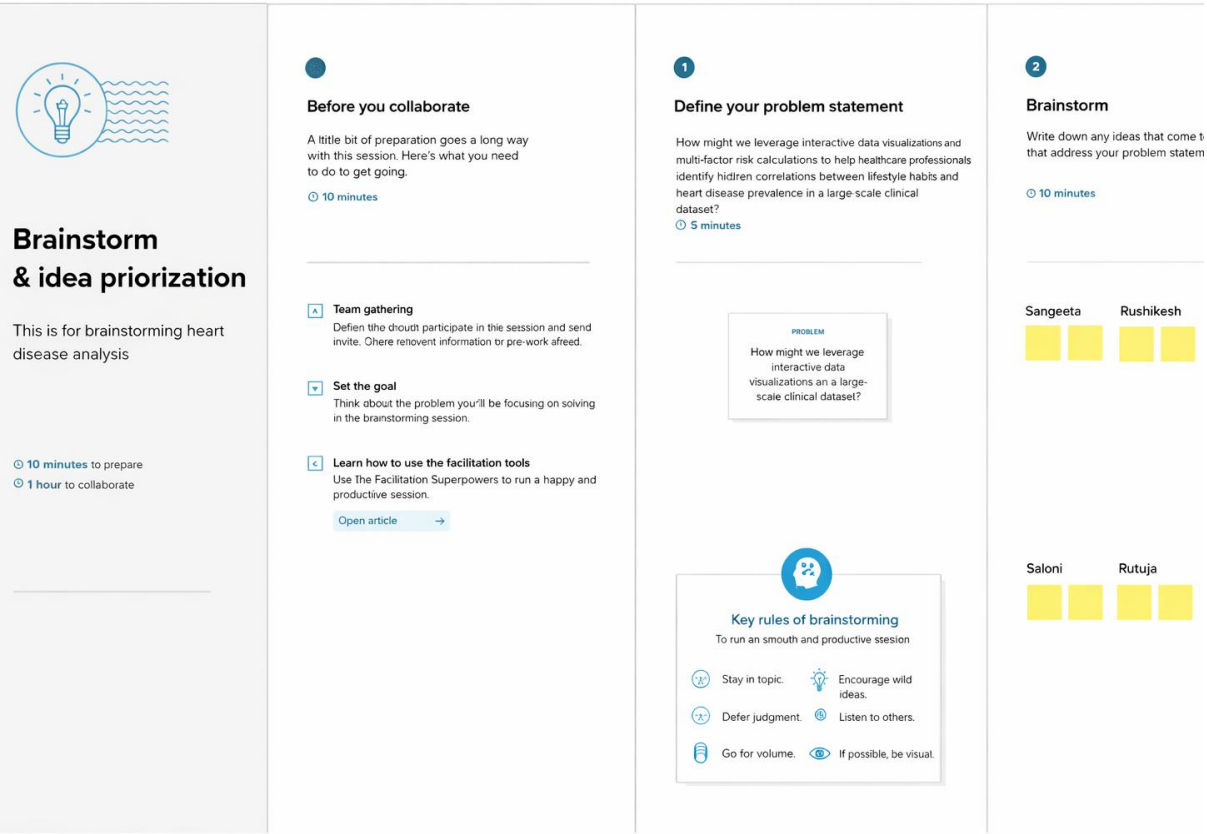
IDEATION PHASE

Brainstorm & Idea Prioritization Template

Date	02 March 2026
Team ID	
Project Name	Exploration of Electricity Consumption Patterns
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

HMW Statement: *How might we design interactive dashboards and predictive models to help utility providers and consumers identify hidden patterns in electricity usage, optimize consumption, and reduce costs while supporting sustainability goals?*



Step-2: Brainstorm, Idea Listing and Grouping

Peak Load Detection: Identify hours of maximum electricity demand and visualize them with heatmaps.
Appliance-Level Consumption: Break down usage by category (lighting, cooling, heating, appliances).
Seasonal Trend Analysis: Compare consumption across summer, monsoon, and winter periods.
Smart Meter Data Integration: Real-time monitoring of household or industrial usage.
Consumption vs. Tariff Mapping: Show how usage patterns align with tariff slabs.
Carbon Footprint Estimation: Translate electricity usage into CO_2 emissions for sustainability tracking.
Interactive Geographic Filtering: Drill down by city, district, or neighborhood to identify high-consumption zones.

Step-3: Idea Prioritization

1. High Importance / High Feasibility (Quick Wins):

- Peak Load Detection (easy with SQL + Tableau).
- Seasonal Trend Analysis (straightforward time-series visualization).
- Consumption vs. Tariff Mapping (valuable for billing insights).

2. High Importance / Low Feasibility (Major Projects):

- Smart Meter Data Integration (requires IoT + backend infra).
- Carbon Footprint Estimation (needs external emission factor datasets).

3. Low Importance / High Feasibility:

- Basic kWh Record Counting (easy but limited insight).

4. Low Importance / Low Feasibility:

- Manual Data Entry Forms (inefficient compared to automated meter feeds).

4

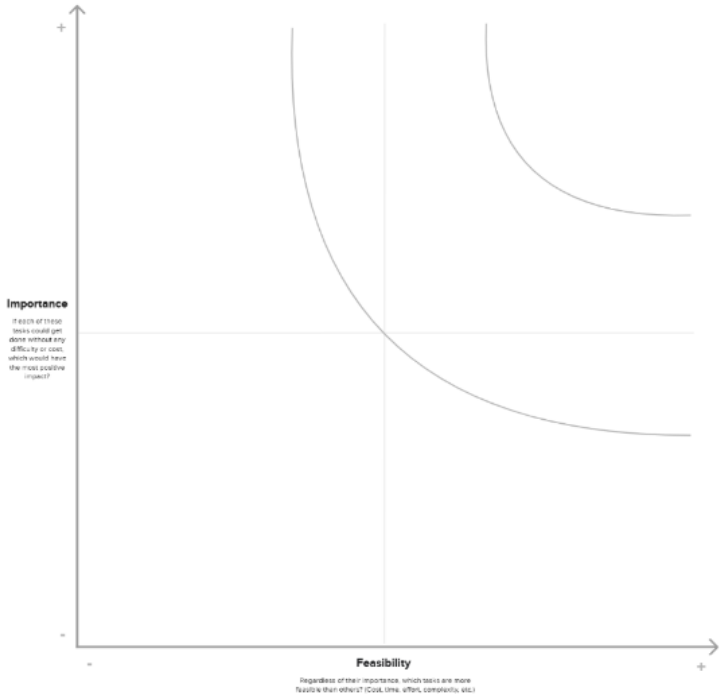
Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H key** on the keyboard.



After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

A **Share the mural**
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

B **Export the mural**
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint
Define the components of a new idea or strategy.
